

# Hubertus Knives

from the knife manufacturer Otter

## HUNTING KNIFE HUBERTUS

The OTTER family has grown - with the coming summer, Hubertus Springer are joining our range. The knives are handmade in our manufactory. Choose between different handle scales, blade shapes and handle lengths! This way, your Hubertus Springer can be individually adapted to your preferences. All blades are made of 1.4043 stainless steel. Bolsters, tang and liner are made of

nickel silver. All models have a lever lock that functions as both a safety and a trigger. The variants with the ending HH.10 and Hz.10 have a handle length of 100mm and a blade length of 76mm. The knives with the suffix HH.11 and Hz.11 have a handle length of 110mm and a blade length of 82mm.
